### **DETAILED ACTION**

1. This action is responsive to amendment filed February 14, 2005.
2. Claims 1-21 are pending.

### ***Response to Amendments***

3. Per Applicants' request, claims 1-6 and 11-15 have been amended; new claims 16-21 have been added.
4. The rejection of claims 1-15 under 35 U.S.C. § 112, second paragraph on the grounds that the base claims 1, 6 and 11 are indefinite is withdrawn in view of Applicants' amendments to claims 1, 6 and 11 to clarify the meaning of the identified limitations in these claims.
5. The rejection of claim 11 under 35 U.S.C. § 112, second paragraph and under 35 U.S.C. § 101, as being a single claim, which claims both an apparatus and the method steps of using the apparatus is withdrawn in view of Applicants' amendments to this claim. The rejection of the dependent claims from claim 11 is also withdrawn.
6. Applicant's arguments, see Remarks/Arguments, pp. 10-15, filed February 14, 2005, with respect to claims 1-15 have been fully considered and are persuasive. The rejection of these claims as being unpatentable over the prior art of record has been withdrawn.

### ***Examiner's Statement of Reason(s) for Allowance***

7. Claims 1-21 are allowed.
8. The following is an examiner's statement of reasons for allowance:  
The Examiner agrees with Applicants that the prior art of record, taken individually or in any combination, fail to teach an article of manufacture, method,

and computer system for updating an application program as required by independent claims 1, 6 and 11.

Specifically, Hayes or Kenner, fails to teach or suggest the claim requirement of downloading a user configuration to a local data processing system and then determining if an item described in the user configuration has been updated, and if so retrieve the updated item and build the application program with the updated item. Instead, Hayes teaches storing configuration preferences on a server and downloading to a workstation and Kenner teaches determining and downloading updates to codecs in a local registry file on a system. Since Kenner teaches away from the claim requirement that the determination and retrieval are performed with respect to an item in a user configuration defined and downloaded from a remote data processing system, Kenner cannot be used in combination with Hayes to teach the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
